WELCOME TO

# Digital Transition

CONFERENCE

## About The Event

The Digital Transition Conference is a platform designed to foster digital education in Ghana. It will highlight the significance of digital learning, explore potential corporate partnerships to sponsor schools for digital initiatives, delve into the latest trends in educational technology (EdTech), and facilitate connections between educators, stakeholders, and tech leaders to drive digital transformation within schools.

This conference is an opportunity for educators, policymakers, tech experts, and industry leaders to come together to discuss challenges, share best practices, and explore innovative solutions to enhance digital education in Ghana. By fostering collaboration and knowledge exchange, this event aims to empower educators and students to embrace the digital age and unlock new opportunities for learning and growth.

RecellGhana

## About Us

RecellGhana Computerlabs is a Social Enterprise setup by RecellGhana and 1A Computerlabs.

We aim to empower educational institutions with carefree Computerlab solutions that foster digital literacy, bridge the technology gap, and equipping learners with the skills and resources necessary to thrive in a technologically advancing world.

We're on a mission to offer children in Ghana the opportunity to develop their ICT skills which are crucial 21st-century competences that will help launch Ghana into the digital age

## Purpose (Why)

The purpose of RGC's Computerlab-as-a-Service is to empower schools in Ghana to provide essential ICT training to students, enhancing their career prospects and contributing to societal development. By offering a complete solution that eliminates the need for schools to invest in equipment, maintenance, or internet access, we make it simple for educational institutions to deliver impactful digital education.

## Result (What)

By the end of 2024, RGC aims to equip at least 40 public schools in the Greater Accra region, reaching 12,000 learners. Our goal is to establish a self-sustaining business model that effectively delivers this service within the market, ensuring continued impact and accessibility.

## Process (How)

By setting up a joint social venture between Recell from Ghana and 1A from Netherlands, the best of both worlds can be combined to solve the societal challenge to develop digital literacy (SDG 4) in a professional and entrepreneurial way. An agile development process is deployed to gradually achieve good services that fit the market.
